

8/2/76

Dear Jack,

Thanks for the McCabe column and the review.

I know the earlier Blair work and of all the things I might read today if I had time their's would not be near the top. There is, for example, nothing new on the Addison stuff. I know the guy who did that work and published it in medical journals ten years ago, yet the Blairs claim it as their own from the ~~xxxx~~ reviews.

Revisionism is in. They want money so they go where it is.

Who would want a more vigorous President that JFK was -with Addison's disease?

And how about Ike's very serious heart attack and illeitis?

I'm staying very busy and quite successfully in court, forcing more out all the time. Even with new legal precedents but unreported.

If those ladies from Dallas are willing to talk a little I'd sure like to get out there!

Thanks and best,
